

In an effort to more effectively manage additional winter gate space at Dominion East Ohio's (DEO) TETCO/REX - Clarington and T interconnects, DEO will be allocating any additional gate space to the traditional transport suppliers (Full Requirements, General, and Daily) November 2016 transportation pool's estimated peak day usage. The assigned gate space volumes will be for the November 2016 th

Suppliers operating non-Energy Choice/SSO transportation pools (i.e., Full Requirements, General, and Daily) will receive an email informing them of the assigned gate space amount (dth/day) at both TETCO/REX-Clarington and TGP-Gilmore interconnects. Suppliers on Wednesday, October 19, 2016 indicating whether they will accept the allocated volumes for the winter term. Any allocated volume made available to other suppliers on Thursday, October 20, 2016 and will be re-assigned on a first-come, first-served basis.

DEO requests that suppliers who accept their assigned gate space plan to deliver those volumes at the assigned locations through issues an Operational Flow Order (OFO), pursuant to Sections 8 and 13 of its General Terms and Conditions of Transportation Service Pooling Service Terms and Conditions, suppliers may be required to deliver volumes equivalent to the allocated gate space. Failure to comply may result in non-compliance charges.
